-i- PATHWAY: Peptidoglycan biosynthesis.
-i- SUBCELLULAR LOCATION: Cytoplasmic (Probable).
-i- SUBCELLULAR: Belongs to the murCDEF family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             "The genome sequence of Bacillus anthracis Ames and comparison to closely related bacteria.";

FUNCTION: Cell wall formation.
CATALYTIC ACTIVITY: ATP + UDP-N-acetylmuramoyl + L-alanine
phosphate + UDP-N-acetylmuramoyl-L-alanine.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   10-OCT-2003 (Rel. 42, Created)

Microbiol. 20:339-350(1996).
-!- FUNCTION: Cell wall formation.
-!- CATALYITC ACTIVITY: ATP + UDP-N-acetylmuramoyl + L-alanine = ADP
-!- CATALYITC ACTIVITY: ATP + UDP-N-acetylmuramoyl-L-alanine.
-!- PATHWAY: Peptidoglycan biosynthesis.
-!- SUBCELLULAR LOCATION: Cytoplasmic (Probable).
-!- SIMILARITY: Belongs to the murCDEF family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     PIR; C69662; C69662.

-i - FUNCTION: Cell wall formation.

-i - CATALYTIC ACTIVITY: ATP + UDP-N-acetylmuramoyl + L-alanine = ADP phosphate + UDP-N-acetylmuramoyl-L-alanine.

-i - PATHWAY: Peptidoglycan blosynthesis.

-i - SUNCELLULAR LOCATION: Cytoplasmic (Probable).

-i - SUNLIARITY: Belongs to the murCDEF family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      MEDLINE=22220767; PubMed=12235376;

-!- CATALITIC ACTIVITY: AIP + UDP-Nacetylmuramoyl + L-alanine = ADP
-!- Dhosphate + UDP-N-acetylmuramoyl-L-alanine.
-!- PATHWAX: Peptidoglycan biosynthesis.
-!- SUBCELLULAR LOCATION: Cytoplasmic (Probable).
-!- SIMILARITY: Belongs to the murCDEF family.
